

RevenueCyclePro

The all-in-one coding tool for hospitals

The hospital revenue cycle is affected by frequent regulatory changes, a high volume of claims, increasingly complex hospital billing and reimbursement rules, and ongoing coding changes – all of which make it difficult to stay compliant.

A single source to meet your coding, billing, compliance and reimbursement needs

RevenueCyclePro.com is a comprehensive, online problem-solving tool that compiles the critical reference data hospitals need to increase efficiency across the entire revenue cycle. RevenueCyclePro.com provides:

- Access to a complete library of medical code sets, UB-04 billing and coding tips, and reimbursement information to address problems that are core to hospital revenue cycle processes
- A simplified research process that boosts productivity, featuring a search engine that helps you quickly find codes you are looking for – using acronyms, abbreviations or medical terms, and exclusive code crosswalks and coding tips that provide quick links from clinical codes to CMS source documentation, billing and reimbursement information
- Historical data for the previous 4 years (will expand to 7 years in the future), allowing the user to resolve older claim problems using the codes, billing and coverage rules in effect at the time
- Tools to help you resolve your most prevalent coding and billing errors and prevent rejections by using the latest UB-04 data set and Medicare billing guidelines, as well as revenue codes linked to CPT®/HCPCS codes
- Complete, updated Part A and Part B LCD policies, medical necessity data and national coverage policies (NCDs) with crosswalks to CPT®/HCPCS, ICD-10/ICD-9-CM revenue codes and billing code types to help you manage the ABN process and reduce denials

Quickly access medical code sets and vital referential information and tips related to Medicare and UB-04 billing.

Consider combining RevenueCyclePro.com with:

Supply Item Advisor

Provides an extensive compilation of supplies so hospitals can ensure they comply with CMS guidelines for medical supply charging and reporting. This add-on helps improve supply management by identifying inconsistencies, and simplifies the maintenance of the Materials Management Item Master.

RevenueCyclePro.com Facility Encoder Module Add-on

Provides access to our proven hospital encoder technology in one seamless product, helping coders achieve accuracy and high productivity.

RevenueCyclePro.com goes beyond the basics

In addition to convenient, online access to up-to-date coding content, the comprehensive set of reference tools in RevenueCyclePro.com helps you address many of the shortfalls that often result in claim rejections, denials and underpayments. The value-added, accurate and updated coding content and references, edits, crosswalks and links help users reduce denial rates and the time it takes to code and bill, while improving revenue cycle performance indicators.

Robust features include:

Optum® CodeLogic™ search engine. Search using keywords across all diagnostic and procedural code sets simultaneously for hospital outpatient and inpatient reporting.

APC calculator. A sophisticated outpatient calculator helps you validate and manage outpatient APC and composite APC reimbursement under Medicare, identify and resolve underpayments, and determine the patient's copayment amount.

Clinical documentation guidelines. Proprietary documentation by Optum promotes higher levels of coding. The documents are linked to the applicable diagnosis and procedure codes.

Essential DRG calculator. The DRG calculator gives you a more accurate DRG-level payment rate using hospital-specific DRG calculations for each DRG, based on the operating and capital values in effect for each provider number.

A robust compliance editor and ABN generator tool, powered by Optum Claims Manager Facility, scrubs at the claim level for Medicare, Medicaid and commercial compliance. This allows you to capture and correct errors before submittal for fewer denials and provides official LCD, NCD and CCI source material based on date of service, which can assist in the denial resolution process. Additionally, this tool can be used to generate an advanced beneficiary notice (ABN) for patient signature.

Uniform Billing Editor e-book. Directly access this resource for definition of and requirements for each Field Locator. Understand billing structures such as type of bill codes and revenue codes, and access proprietary UB-04 billing and coding tips that address problems that are core to hospital revenue cycle processes.

DRG Grouper Calculator Add-on available. Group diagnosis and procedure codes to DRGs using the same EasyGroup™ logic that many major industry systems are using. Obtain provider-specific reimbursement, including outliers, for the DRG using the powerful add-on tool.

HCC Analyzer. This innovative tool allows for immediate identification of applicable HCC codes across various model types (CMS, ESRD, RX, HHS-commercial) and facilitates greater clarification through a unique calculator that displays side-by-side HCC coding scenarios. Additionally, the HCC Analyzer introduces industry-first HCC edits, which highlight clinical and coding documentation improvement opportunities.

Use RevenueCyclePro.com to:

- Quickly access the data and medical code sets needed to capture outpatient and inpatient reimbursement
- Answer questions about coding, billing, coverage and reimbursement
- Resolve edits, problems and issues related to the codes and other data reported on the claim to minimize noncompliance exposure

Maximize your coding compliance efforts.
