Consolidate the coding process with the **Coding Companion**, your one-stop coding resource developed exclusively for ophthalmology. This comprehensive and easy-to-use guide is updated for 2023 and organized by specialty-specific CPT[®] codes. Each CPT[®] code includes its official description and lay description, coding tip, Medicare edits, and relative value units and is cross-coded to common ICD-10-CM diagnosis codes to complete the coding process. Getting to the code information you need has never been so easy.
