

ASA CROSSWALK[®] Add-on

The American Society of Anesthesiology (ASA) CROSSWALK[®] Add-on provides essential coding content for all anesthesia coders and billers. This add-on allows you to search CPT[®] to Anesthesia CPT[®] code relationships (and vice-versa, Anesthesia CPT[®] to CPT[®]) as shown directly by the ASA. Also, Optum360 provides ASA base units and even a calculator for pricing based on ASA base units. Whether coding pairs are primary or alternative, the inclusion of ASA-provided comments on RVG, crosswalks or crosswalk instructions assists in providing strong direction when crosswalking a CPT[®] code to an anesthesia CPT[®] code.

Key features and benefits

- Crosswalk to ASA codes from CPT[®] codes
- ASA base units
- Reverse crosswalk to CPT[®] codes from anesthesia codes
- Includes RVG comments, crosswalk comments and crosswalk instructions

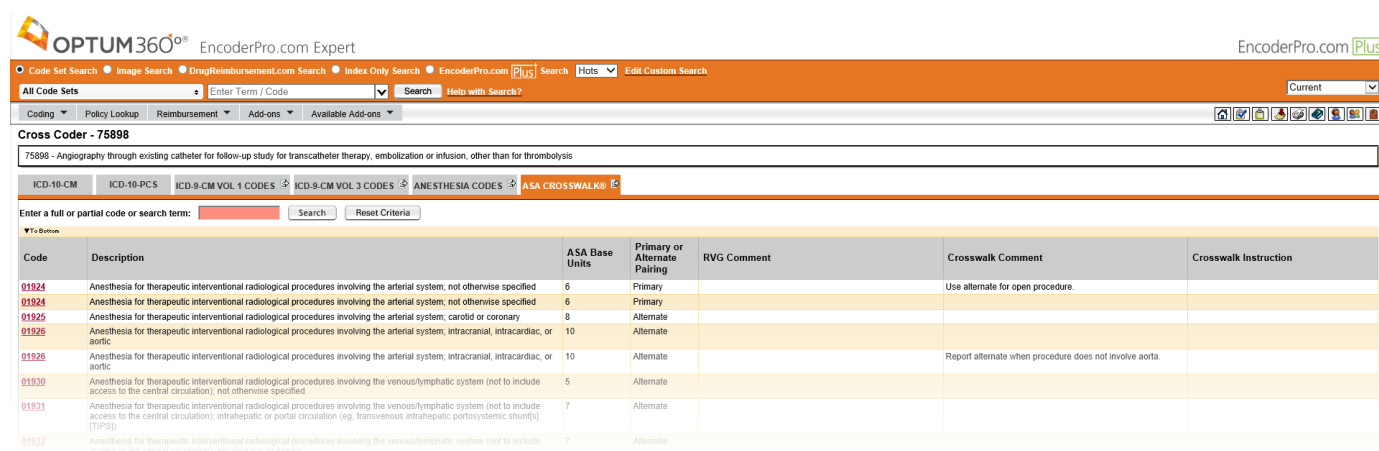

Item number:

WA24

Price:

\$199.95 per user, multiple-user pricing available.

Code	Description	ASA Base Units	Primary or Alternate Pairing	RVG Comment	Crosswalk Comment	Crosswalk Instruction
01924	Anesthesia for therapeutic interventional radiological procedures involving the arterial system; not otherwise specified	6	Primary		Use alternate for open procedure.	
01924	Anesthesia for therapeutic interventional radiological procedures involving the arterial system; not otherwise specified	6	Primary			
01925	Anesthesia for therapeutic interventional radiological procedures involving the arterial system; carotid or coronary	8	Alternate			
01926	Anesthesia for therapeutic interventional radiological procedures involving the arterial system; intracranial, intracardiac, or aortic	10	Alternate			
01926	Anesthesia for therapeutic interventional radiological procedures involving the arterial system; intracranial, intracardiac, or aortic	10	Alternate		Report alternate when procedure does not involve aorta.	
01930	Anesthesia for therapeutic interventional radiological procedures involving the venous/lymphatic system (not to include access to the central circulation); not otherwise specified	5	Alternate			
01931	Anesthesia for therapeutic interventional radiological procedures involving the venous/lymphatic system (not to include access to the central circulation); intrahepatic or portal circulation (eg, transvenous intrahepatic portosystemic shunt[s] [TIPS])	7	Alternate			
01932	Anesthesia for therapeutic interventional radiological procedures involving the venous/lymphatic system (not to include access to the central circulation); intracardiac or aortic	7	Alternate			

ASA to CPT® code crosswalk page

The screenshot displays the Optum360 EncoderPro.com Expert interface. At the top, there's a navigation bar with various search options like 'Code Set Search', 'Image Search', 'Drug/Reimbursement.com Search', 'Index Only Search', 'EncoderPro.com [Plus] Search', 'Hotels', and 'Edit Custom Search'. Below this is a search bar with 'All Code Sets' selected and a 'Search' button. The main content area is titled 'Cross Coder - 01924' and shows a table of crosswalks between ICD-10-CM and ICD-9-CM codes. The table has three columns: 'Code', 'Description', and 'Primary or Alternate Pairing'. The first row shows ICD-10-CM code '01924' and ICD-9-CM code '01.92' with the description 'Anesthesia for therapeutic interventional radiological procedures involving the arterial system, not otherwise specified'. The table lists several other codes and their descriptions, including 'Transcatheter placement of extra-cranial vertebral artery stent(s)', 'Transluminal peripheral atherectomy', 'Transluminal peripheral atherectomy, open or percutaneous', 'Transluminal peripheral atherectomy, open or percutaneous, including radiological supervision and interpretation', 'Transluminal peripheral atherectomy, open or percutaneous, including radiological supervision and interpretation; visceral artery (except renal), each vessel', 'Transluminal peripheral atherectomy, open or percutaneous, including radiological supervision and interpretation; brachiocephalic trunk and branches, each vessel', 'Transluminal peripheral atherectomy, open or percutaneous, including radiological supervision and interpretation; iliac artery, each vessel', 'Endovascular repair of iliac artery bifurcation (eg, aneurysm, pseudoaneurysm, arteriovenous malformation, trauma, dissection) using bifurcated endograft from the common iliac artery into both the external and internal iliac artery, including all selective and/or nonselective catheterization(s) required for device placement and all associated radiological supervision and interpretation, unilateral', 'Transcatheter renal sympathetic denervation, percutaneous approach including arterial puncture, selective catheter placement(s) renal artery(ies), fluoroscopy, contrast injection(s), intraprocedural roadmapping and radiological supervision and interpretation, including pressure gradient measurements, flush aortogram and diagnostic renal angiography when performed, unilateral', 'Transcatheter renal sympathetic denervation, percutaneous approach including arterial puncture, selective catheter placement(s) renal artery(ies), fluoroscopy, contrast injection(s), intraprocedural roadmapping and radiological supervision and interpretation, including pressure gradient measurements, flush aortogram and diagnostic renal angiography when performed, bilateral', 'Endovascular femoral-popliteal arterial revascularization, with transcatheter placement of intravascular stent graft(s) and closure by any method, including percutaneous or open vascular access, ultrasound guidance for vascular access when performed, all catheterization(s) and intraprocedural roadmapping and imaging guidance necessary to complete the intervention, all associated radiological supervision and interpretation, when performed, with crossing of the occlusive lesion in an extraluminal fashion', 'Endovascular repair of iliac artery by deployment of an ilio-iliac tube endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and all endograft extension(s) proximally to the aortic bifurcation and distally to the iliac bifurcation, and treatment zone angioplasty/stenting, when performed, unilateral, for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, arteriovenous malformation)', and 'Endovascular repair of iliac artery by deployment of an ilio-iliac tube endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and all endograft extension(s) proximally to the aortic bifurcation and distally to the iliac bifurcation, and treatment zone angioplasty/stenting, when performed, unilateral, for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, arteriovenous malformation)'.
