DRG Grouper Calculator Add-On
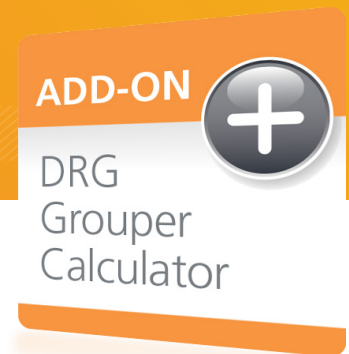

The Optum360® DRG Grouper Calculator Add-on is a simple tool used to group and calculate diagnosis and procedure codes into the correct DRG, based on dates of service. Reimbursement calculations are hospital specific, showing users the exact DRG reimbursement expected at any specific acute care facility. Integrated with RevenueCyclePro.com, comprehensive reference content at your fingertips allows you to research elements that affect your DRG such as CC/MCC, procedure by proxy and optimizing tips.

Key features and benefits

- **Optum360 edge:** Leverages industry-leading reimbursement calculations from Optum360® EasyGroup Rate Manager and grouping logic from Optum360® Enterprise CAC.

- **Provider lookup:** Easy lookup tool helps users quickly find any acute care hospital by provider number or hospital name.

- **MS-DRG grouping:** Groups at the claim level with results, including MDC, DRG, DRG description and identifies the CC/MCC (Complication or Comorbidity/Major Complication or Comorbidity) diagnosis code. Easy-to-use screen enables you to change codes and dates very quickly.

- **Side-by-side display:** Allows users to enter more than one code scenario at a time and compare results side by side. Enables users to identify potential errors in reimbursement or potential opportunity for additional reimbursement.

- **Reimbursement calculations:** Provides claim-level reimbursement results, including outlier payments. Detailed worksheet results displayed on screen and in printable format so users can view all the variables affecting the hospital's reimbursement.

- **Integrated with RevenueCyclePro.com:** All the comprehensive content within RevenueCyclePro.com is available to research and review the codes involved in the DRG, MDC, CC/MCC, MDC Optimizing Tips, DRG crosswalks and more.
